DIV. OF OIL, GAS & MINING

Subject: Requirement for Notification of Temporary Suspension, United Minerals LLC, TRC Mine,
S/015/0098, Emery County, Utah

Dear Mr. Western,

After brief conversation with Paul Baker at the Division office we send this letter to inform you of our intentions with the TRC Mine. At this time the mine is in non-producing status. We have had several training sessions with MSHA Mine Emergency Unit Mine Rescue Teams, we are also working with Linear Edge Technologies on testing an underground wireless communication system. We foresee putting the TRC Mine in production within 5 years due to customers request to obtain product from this mine. At this time we would like to keep the mine portals open and not begin reclamation. We will keep you updated as to any changes we see that may affect the status of the mine. If you have any questions feel free to call me at (435)630-6348.
